

Bunker Hill and Grissom Air Force Base (Images of Aviation)

As the US Navy recovered from the devastating attack on Pearl Harbor, the aircraft carrier earned a place alongside the battleship, and the Navy grew its air force. Pilots were needed as fast as American industry could build airplanes, and Indiana became the home of a naval air-training center. After fascisms defeat with the end of World War II, a potentially more deadly Cold War brought the need for a deterrent force capable of surviving a nuclear attack and then completely destroying the enemy. A vital part of that force moved into the old Hoosier Navy Base in 1954. For more than three decades, Bunker Hill and Grissom airmen stood on the forward wall of Americas freedom. Images of Aviation: Bunker Hill and Grissom Air Force Base tells their story through an amazing collection of declassified US Air Force photographs.
